

회계원리 기말대비 (lect.2~10)

2. Understanding Accounting

Concept of Accounting

- Company : 소비자에게 재화(Goods)와 서비스(Services)를 생산/제공 하는 경제 주체
- Accounting : 기업에 관한 재무정보(Financial Info.)를 필요한 사람에게 제공
 - ∴ 기업 : 재화/서비스를 판매 -> 수익 창출
 - 판매 과정 = 거래; 거래를 체계적 분류/요약/기록
- 기록의 필요 : 기억의 성과를 알기 위해.
 - 왜? 누가 필요? : 투자자&정부&외/내부 이해관계자
 - 성과 -> 재무제표
- 회계의 정의 : Accounting is an information system that systematically produces information about business activities and their economic impacts, which helps information users for their decision-making.

Accounting & Accounting Info.

- Operating Activity : Core revenue generating activities
- Investing Activity : Infrastructure-building activities (money spent for the future)
- Financing Activity : Activities funded by borrowed money

Accounting Activities and Users

- Importance of Accounting
 - 좋은 회계정보 -> 좋은 의사결정 : 외부이해관계자(투자자/채권자) & 내부이해관계자(판매/투자/고용) 도움
 - 회계는 기업의 언어 : 언어에 관계X. 기업 이해
- Basic Activities of Accounting
 - 거래 식별 -> 기록 -> 분류 -> 전달(or 재무제표 작성)
- Users of Financial Info.
 - 내부 이용자 : 관리회계->의사결정
 - 외부이용자 : 재무회계->의사결정

Elements of Accounting

- Accounting Standards : IASB(국제), GAAP(미국)

- IASB->IFRS

- Measurement Principles(IFRS; 둘 중 하나 채택)
 - Historical cost principle : 자산을 취득당시의 원가. 보유중에도 적용.
 - Fair value principle : 자산/부채를 현재시점 시장가치; 주기적 시세 평가
- Qualitative Characteristics of Financial Info.
 - 회계정보의 유용성
 - 관련성/목적적합성 : 의사결정 도움
 - 충실한 표현 : 사실을 정확히 반영
- 4 Basic Accounting Assumption
 - Economic Entity Assumption : 기업 ≠ 소유주 회계단위
 - Monetary Unit Assumption : 화폐 표현 ○ 거래만
 - Going Concern Assumption : 청산/축소 X 계속 경영○
 - Time Period Assumption : 기업활동->주기적 재무정보 제공

Accounting EQ. & Components

- Asset(자금운용 -> 돈 범) = Liabilities(갚을 남 돈) + Equity(내 돈; 투자/잉여금)
 - Asset : 기업의 보유 자원
 - Liabilities : 갚아야 할 빚&의무
 - Equity : 자산-부채; 기업이 실소유중인 몫

Methods and Principles for Accounting EQ.

- Double-entry Bookkeeping(복식부기)
 - √ 거래 -> 차변(debit) & 대변(credit)에 양쪽 기록. 등식을 항상 성립
- Duality of Transaction(거래의 양면성)
 - 한 거래 -> 동일 금액으로 최소 2계정(차/대)에 영향
- Debit & Credit Rules(차/대변 기록 규칙)
 - 자기 집에선 (+), 아닐경우 (-)
 - 왜 자 : 차↑, 대↓? ->회계등식을 위한 규칙 & 약속.

De. Cr.

자산(+) 부채(+)

자본(+)

3. Accounting Equation & Financial Statement

Accounting EQ & components 2

- Components of Equity : 자본의 2가지 종류
 1. 사장이 직접 넣은 돈 : Contributed Capital
 2. 기업이 벌어들인 돈 : Retained Earnings
 - 통상적으로 $Rev. > Exp. \rightarrow (RE = Rev - Exp)$
 - $\therefore Asset = Liabilities + \{Contributed Capital(납입 자본) + Retained Earnings(이익잉여금)\}$
 - $\Rightarrow A=L+\{C.C+RE[Rev.-Exp.-Dividends]\}$
- Equity : share capital(주식 자본)+Revenue+Expense+Dividends(배당금)
 - share capital : 주주들에게 주식을 발행한 부분

Financial Statements

- Income statement (I/S) : 손익계산서; 특정 기간동안의 수익/비용에 따른 총손익 제시
- Retained Earning Statement (R/Es) : 이익잉여금 계산서; 특정 기간동안의 이익잉여금의 변화를 추적
- Statement of Financial Position(Balance Sheet, B/S) : 재무상태표(대차대조표); 특정 날짜의 자산/부채/자본을 보고
- Statements of Cash Flows(C/Fs) : 현금흐름표; 특정 기간동안 현금흐름(유출/유입)을 추적
- 재무상태표의 흐름 : I/S-(net income)->R/Es-(end. R/E)->B/S-(Cash)->C/Fs

- Acc EQ : $Asset + Exp. + Div. = Liabilities + share capital + Beg. R/E + Rev$

Income Statement

- $Rev(>/<)Exp \rightarrow net$ (income/loss) : does not include Investment & Dividend transaction

Retained Earning Statement

- 기초 이익잉여금+총수익-배당금=기말 이익잉여금

BUSINESS CONSULTING COMPANY STATEMENT OF RETAINED EARNINGS For the Year Ended December 31, 2015	
Retained earnings at January 1, 2015	\$ 20,000
Add: net income earned in 2015	18,000
Subtotal	38,000
Less: dividends declared in 2015	3,000
Retained earnings at December 31, 2015	\$ 35,000

Statement of Financial Position

- 자산 부채 자본을 위에서부터 아래로;
 - 반드시 $\sum Assets = \sum Liabilities + \sum Equities$
- 재무상태표는 특정 일자의 상태; 나머지 3개는 특정 기간 동안의 상태를 추적

Statement of Cash Flows

- C/Fs reports : Cash effects of Company's (Operations/Investing/Financing) Activities
 - net (increase/decrease) in cash during the period
 - cash amount of the end of the period

4. Recording Process

Recording process

![[Pasted image 20260401163944.png]]

Journalizing and Posting to Ledger(분개&전기)

Debit	Credit
Assets	Liabilities
	Equity
Expense	Revenue

- Accounting Equation
 - $Assets = Liabilities + Equity (= share capital + R/E (= Beg. R/E + Net Income (= Revenues - Expenses) - Dividends))$
 - $\therefore Assets + Expense + Dividends(배당금) = Liabilities + Share Capital(주식 자본) + Beg. R/E(기초 이익잉여금) + Revenues$

• Journalize at Journal

GENERAL JOURNAL J1				
Date	Account Titles and Explanation	Ref.	Debit	Credit
2025 Sept. 1	1 2 Cash	5	15,000	
	3 Share Capital—Ordinary (Issued shares for cash)			15,000
1	4 Equipment		7,000	
	Cash (Purchase of equipment for cash)			7,000

- 1. 거래일 2) 차변 계정과목 3) 대변 계정과목 4) 거래에 대한 간략한 설명 5) 참조 컬럼

• Posting Ledger using T-account

JOURNAL			
Date	Accounts and explanation	Debit	Credit
Sep 1	Cash	15,000	
	Share Capital		15,000
	Issued ordinary shares		

Cash	Share Capital
\$15,000	\$15,000

Cash			
3/1	600	3/15	400
3/4	2,280	3/19	92
3/31 Bal.	2,388		

Unadjusted Trial Balance (수정 전 시산표)

- 총계정원장 기록에 오류 X인지 확인 위해 작성; 오류 탐지 기법?
 - 총계정원장을 한 표에 집계
 - 대차 평균의 원리 : 차-대변 금액이 동일
- 시산표의 한계 (이런 오류 하에도 차/대변 일치)
 - 거래 분개 X
 - 분개가 전기 X
 - 같은 분개 2번 전기
 - 분개/전기 시 잘못된 계정
 - 금액 기록시 상쇄되는 오류

5. Adjusting Entries

Adjusting Entries (기말수정 분개)

- 이유 : 발생주의 기준 수익/비용 인식원칙 반영, 회계기간 동안의 손익 & 기말 재무상태를 정확히 표시하기 위해. (정확한 측정)
- 비용과 수익 인식 원칙(recognition principles) 적용
- 재무제표(financial statements) 준비 여부와 상관X 요구됨.

- 재무제표는 기말수정 분개 후 기말에 발행. 왜?
 - 모든 계정을 실시간으로 반영시 비용 ↑

Adjusting the Accounts(수정분개)

Deferrals (이연)

- 현금이 먼저, 회계(수/비)는 나중에; 차감되는 부분은 $\frac{(\text{총액})}{(\text{총기간})}$
 - Prepaid expense (선급비용 - 자) : 재화/서비스를 이행받기 전 대금 지급
 - Supplies (소모품)
 - Jun 2; supplies 700 | Cash 700 -> Jun 30; Supplies expense 300 | Supplies 300
 - 비품을 선급비용으로 인식, 기말에 사용한만큼 차감
 - Insurance (보험)
 - Oct 4; Prepaid Insurance 600 | Cash 600 -> Insurance Expense 50 | Prepaid Insurance 50
 - Unearned revenues (선수수익 - 부) : 재화/서비스를 이행하기 전 대금 수급
 - Oct 2; Cash 1200 | Unearned Service Revenue 1200 -> Oct 31; Unearned Service Revenue 400 | Service Revenue 400

Accruals (발생액)

- 발생액 : 수익/비용을 현금이 실제로 오가기전에 발생한 시점에 기록.
 - 즉, 현금흐름과 관계 X. ; 발생된 수익/비용을 그때 기록. 정확한 재무상태 반영
- 2 types of Accruals :
 - Accrued Rev. (미수수익-자산) : 재화/서비스 미리 제공함 & 수익 인식 but, 현금 나중
 - Accrued Exp.(미지급 비용-부채) : 재화/서비스 미리 제공받음 & 비용 인식 but, 현금 나중

PREPAIDS –CASH FIRST			
	FIRST	LATER	
Prepaid expenses	Prepaid expense	Expense	
	Cash		Prepaid expense
Unearned revenues	Cash	Unearned revenue	
		Unearned revenue	Revenue
ACCRUALS – CASH LATER			
	FIRST	LATER	
Accrued expenses	Expense	Payable	
		Payable	Cash
Accrued revenues	Receivable	Cash	
		Revenue	Receivable

6. Depreciation & Adj. T/B & Closing Entries

Depreciation

- Expired Cost (소멸원가) : sale, use, consumption of assets -> expense
 - Direct material cost, cost of goods sold, supplies expense ect.
 - building, structure, equipment, (장기 사용 asset) -> Depreciation expense
- Depreciation (감가상각) : **allocates an asset's cost** to the periods when it's **used**
 - does **not** attempt to report the **actual change in the value** of the asset.
 - Dep. exp. = $\frac{(\text{cost of fixed asset}) - (\text{salvage value})}{(\text{useful time})}$
- Accumulated Depreciation (감가상각누계액) : $\sum$ of all dep. exp.
- summary of Adjusting Process
 - purpose of adj. process : Measure income & Update balance sheet
 - adj. entry affects at least 1 : Rev./Exp. & Asset/Liability

Category of Adjustment	Type of Account	
	Debit	Credit
Prepaid expense	Expense	Asset
Depreciation	Expense	Contra asset
Accrued expense	Expense	Liability
Accrued revenue	Asset	Revenue
Unearned revenue	Liability	Revenue

Adjusted Trial Balance

- Adj. Trial Balance : Shows the balance of all accounts, including those adjusted
 - Proves the equality of Db. bal. & Cr. bal. in the ledger after the adjustments
 - Primary basis for the preparation of financial statements
- Unadj. T/B & adj. T/B
 - unadj.

	₩30,190	₩30,190		

Closing Entries(마감분개)

- 이유 : 회계기간의 temporary account(수익·비용·배당)를 0으로 닫고 그 결과를 retained earnings로 이전, 다음 기간을 새로 시작하기 위해 수행.(당기 마감 & 차기 초 기화)
- Temporary(-> to be Closed) VS. Permanent Accounts(-> to be not closed)
 - Temp. : ∇ {Rev.,Exp.} accounts + Dividends
 - Perm. : ∇ {Asset, Liability} accounts + Equity
- Closing entries formally recognize in the ledger the transfer of:
 - Net income (or net loss) and Dividends to retained earnings
 - Produce a zero balance in each temporary account (revenues and expenses)
 - Companies generally journalize and post closing entries only at the end of the annual accounting period

- Posting of Closing entries

- Post-closing T/B

	Debit	Credit

10. Inventory

Inventory Big Picture

- Inventory : 판매목적 보유 goods -> 판매 전 asset(B/S), 판매 후 COGS(I/S)
- 핵심 2문제 : quantity(몇 개 팔림/남음?) + unit cost(단가 얼마?)
- Historical cost : original purchase cost 기준, selling price/market value X
- Matching principle : revenue 인식 시점에 관련 cost도 COGS로 인식
- Cost split :

$$BI + Net\ purchases = COGAS = COGS + EI$$
 - COGAS(cost of goods available for sale) : 팔 수 있었던 총 원가
 - COGS : 팔린 부분 -> I/S expense
 - EI(ending inventory) : 안 팔린 부분 -> B/S asset

Purchase Cost

- Purchase cost :

$$invoice\ price + freight-in + insurance + taxes/duties + commissions - returns/allowances - discounts$$
- Freight-in : 매입 운송비 -> inventory cost에 포함 O
- Freight-out : 판매 운송비 -> selling expense(SG&A), inventory cost X
- Purchase discount : 2/10, n/30 -> 10일 내 지급시 2% 할인, 아니면 30일 내 전액
- Purchase return/allowance : 하자/반품/가격조정 -> purchase cost 감소

Quantity System

- Perpetual inventory system(계속기록법) : direct deduction, Inventory account 실시간 +/-
 - 고가/개별 추적 쉬운 goods에 적합
 - purchase 시 Inventory 증가, sale 시 Inventory 감소 + COGS 인식
 - 장부상 공식 :
$$BI + purchases - COGS = EI$$
- Periodic inventory system(실지재고조사법) : indirect deduction, purchase 관련 temporary accounts 사용
 - 저가/대량 goods에 적합
 - sale 시 매출만 기록, COGS/Inventory 감소 기록 X
 - 기말 physical count로 EI 확정 -> COGS 역산
 - 공식 : $BI + Purchases + Freight-in - Purchase\ returns/allowances - Purchase\ discounts = COGAS$
$$COGS = COGAS - EI$$

Journal Entries

- Purchase on account
 - Perpetual : Dr Inventory / Cr A/P
 - Periodic : Dr Purchases / Cr A/P
- Freight-in
 - Perpetual : Dr Inventory / Cr Cash
 - Periodic : Dr Freight-in / Cr Cash
- Purchase return/allowance
 - Perpetual : Dr A/P / Cr Inventory
 - Periodic : Dr A/P / Cr Purchase returns/allowances
- Purchase discount
 - Perpetual : Dr A/P / Cr Cash, Inventory
 - Periodic : Dr A/P / Cr Cash, Purchase discounts
- Sale
 - 공통 : Dr A/R(or Cash) / Cr Sales
 - Perpetual 추가 : Dr COGS / Cr Inventory
 - Periodic : sale 시 COGS entry X -> 기말에 계산

Cost Flow Assumption

- 문제 : 다른 단가로 여러 번 매입 -> 팔린 goods의 unit cost를 무엇으로 볼 것인가?
- Physical flow vs cost flow : 실제 물건 흐름과 회계상 원가흐름은 같을 필요 X
- Specific identification : 실제 팔린 개별 item의 실제 원가 추적
 - 자동차/부동산/고가·저빈도·비대체 goods
 - 정확하지만 대량 goods에는 비효율

- FIFO(first-in, first-out) : 먼저 산 원가 -> COGS, 나중 산 원가 -> EI
 - EI가 recent cost 반영
 - 가격상승기 : COGS 낮음 -> GP/NI 높음 -> tax 높음
 - Periodic FIFO : physical count로 EI unit 확인 -> 가장 최근 layer부터 EI 배정 -> COGS 역산
- Average cost : 평균단가 하나로 COGS/EI 배정
 - $$\bar{c} = \frac{COGAS}{units\ available}$$
$$COGS = units\ sold \times \bar{c}$$
$$EI = units\ left \times \bar{c}$$
 - 강의 포인트 : 평균의 의미 위주, periodic/perpetual average 차이는 깊게 X
- LIFO : IFRS 허용 X -> 강의/시험 핵심 X
- Consistency : method는 기간 간 비교 위해 일관 사용 선호, 변경 자체는 가능

기말 계산 흐름

- Perpetual : 거래마다 Inventory/COGS 업데이트 -> 기말 EI는 장부 잔액 중심
- Periodic : 매입 관련 계정 모음 -> physical count로 EI 수량 확정 -> cost flow method로 EI 금액 ->
$$COGS = COGAS - EI$$
- FIFO periodic 예 : EI 수량을 먼저 잡고 최신 매입층부터 채움
- Average periodic 예 : 전체 원가/전체 수량으로 평균단가 1개 계산
- 핵심 함의 : 같은 physical goods여도 method에 따라 COGS/EI/NI 달라짐

백지복원

- Inventory 왜 asset? : 아직 판매 X -> future benefit, 판매 시 revenue와 matching -> COGS
- Inventory 장의 두 축 : quantity system + cost flow assumption
- Purchase cost 구성 : invoice + 매입부대비용 - 할인/환입/에누리
- Freight-in/out 구분 : 들어올 때 원가, 나갈 때 판매비
- Perpetual vs Periodic : Inventory 직접 +/- vs Purchases temp 후 기말조정
- Sale entry 차이 : perpetual은 매출 + COGS 동시, periodic은 매출만
- Periodic COGS 복원 :
$$BI + net\ purchases = COGAS,$$
$$EI\ physical\ count, COGS = COGAS - EI$$
- FIFO 직관 : 오래된 원가가 I/S로, 최신 원가가 B/S로
- 가격상승기 FIFO 함의 : COGS↓ -> gross profit↑ -> net income↑ -> tax↓
- Average 직관 : 여러 purchase layer를 하나의 평균 원가로 섞음
